

GENERAL ZOOLOGY (BIOLOGY 120): COURSE SYLLABUS SPRING 2017

Instructor: Dr. T. Tupper
Office: Bisdorf Room 352
Phone & email: 703-845-6508; ttupper@nvcc.edu
Website: <http://blogs.nvcc.edu/ttupper/>
Facebook: <https://www.facebook.com/nvcczoology/>
Office hrs: See website for office hours and office hour updates

COURSE DESCRIPTION AND GENERAL PURPOSE: Presents basic biological principles, emphasizes structure, physiology, and evolutionary relationships of invertebrates and vertebrates. Lecture 3 hours. Recitation and laboratory 3 hours. Total 6 hours per week. This is a one-semester course for science majors, or nonmajors. In it, students are introduced to the evolution of animals from the Paleozoic to the present. Emphasis is placed on evolutionary relationships, anatomical and physiological characteristics of major phyla, and how they fit into their respective environments. Pre-Paleozoic evolutionary hypotheses are also discussed.

TEXTS: (1) Miller SA, Harley JP. (2007) Zoology, 10th Edition. 592 pgs. McGraw Hill. ISBN 978-0-07-783727-3; 10th edition is a must. (2) Alden P, Cassie B. 1999. National Audubon Society Field Guide to the Mid-Atlantic, 1st Edition. Knopf. 0-679-44682-6.

COMPETENCIES: The student should be able to read and express him/herself both orally and in writing on a college freshman level as measured by a college English competency examination (ENG 111 or permission of instructor). It is helpful to have a working knowledge of blackboard, Microsoft PowerPoint (or equivalent presentation tool) and Word.

EVALUATION: Students will be graded according to the results of four (of 5) hourly exams (totaling 825 points with a dropped quarterly exam), one lab exam (300 points), and lab assignments (totaling 200 points). Your final grade will be based on the percent of points earned out of a possible of 1,325. Submission of all assignments is mandatory and must be turned in by the due dates. Lecture attendance is mandatory, but not graded. The final exam is comprehensive and cannot be dropped (neither can the lab final). Lecture exams will consist of multiple choice and short answer questions. The lab exam focuses on identification of animals by sight and sound, and the ability to identify internal and external features of vertebrates and invertebrates. The lab exam will include all species listed in the table at the end of this document, and everything covered in the laboratory and field. Lab attendance is mandatory and is graded. If you miss more than three labs you will receive a failing grade in the course, this includes the field trip. There are no make-up exams. Your lowest exam grade will be dropped. If you miss an exam, that will be the one dropped. There is no extra credit. I do not hand back and discuss exams during class time. If you wish to do so, please make an appointment to see me and I will go over your exam results with you.

STUDENTS WITH SPECIAL NEEDS: Students with physical disabilities who may require accommodations are encouraged to contact the college center for students with disabilities. Students with learning disabilities should contact disability services; here is the link: (<http://www.nvcc.edu/current-students/disability-services/>). I cannot make accommodations unless I'm presented with the appropriate accommodations form.

PLAGIARISM AND ACADEMIC HONESTY: At Northern Virginia Community College, we expect the highest standards of academic honesty. Academic dishonesty is prohibited in accordance with the Student Conduct, Rights and Responsibilities described in the student handbook (<http://www.nvcc.edu/students/handbook/conduct.html>). NVCC's policies prohibits cheating on examinations, unauthorized access to examinations or course materials, plagiarism and other proscribed activities. Students that violate plagiarism and academic honesty codes will receive a failing grade and will be expelled from this course.

CANCELLATION DAYS: In the event of class/lab cancellation, we will resume where we left off during the next meeting. For example, if we were to have an exam scheduled on September 1, and it snowed, the exam would take place on our next scheduled meeting on September 7th.

IMPORTANT DATES, AUDIT POLICY AND INCOMPLETES: For critical dates regarding refunds, withdraw, etc. see: <https://www.nvcc.edu/calendars/academic.html>. Last day to drop with a refund is January 26th; last day to withdraw without a refund and grade penalty is March 21st. Final exams are the week of May 1st. A student may not audit this course. Incompletes are only granted if the student's circumstances are dire (health issues, deaths in the family). Incompletes will only be granted if students have completed all lab assignments and 4 exams. Incompletes must be approved by the division dean and the provost. Health claims must be documented by medical professionals. The final exam times are different than your normal class meeting time and are posted on my website.

EXTENSION (INCOMPLETES): My policy on extensions is as follows: I will not grant any student an extension unless there are serious and uncontrollable circumstances that prevent the student from completing the work. Falling behind in the work because you get busy juggling work, life and various other "normal" activities is not justification for an extension. Also, in order for an extension to be granted, you must have completed all labs and all but one of your exams. My Dean has to approve these extensions. Unless your requests meet the aforementioned criteria, your request will invariably be denied.

HOW TO SUBMIT ASSIGNMENTS: To submit assignments in blackboard, scroll to the bottom of the page and click on the, "view/complete assignments" tab that corresponds with the assignment that you want to submit. Attach the appropriate file and click, "submit". If for some reason your blackboard interface is different than mine, please contact me and we will figure out the problem together.

COMMENTS ON SUBMITTING WORK: Your work must (1) be free of common spelling errors and typos, and (2) contain one font only, please be consistent. If you cut and paste, clean it up before submitting. Use Times New Roman or similar font. Use only one color, black. When submitting work please label it as the following (as an attachment, use caps lock): LAST NAME_ASSIGNMENT_DATE. You do not need to put your section since you are submitting via Blackboard. All papers and presentations are to be proofed before you submit to me. I will not accept papers that have not been first proofed by the writing center staff. They will provide you with verification that you were there. For assistance with writing contact staff at academic center for reading and writing:

1. Bisdorf room AA 234; 703-575-4709
2. writinghelp@nvcc.edu
3. [Writing Center Website](http://www.nvcc.edu/alexandria/writing/) (<http://www.nvcc.edu/alexandria/writing/>)

EMAILS AND DISCUSSION BOARD: Please use proper English when composing emails and posting discussions. Please keep writing formal, free of slang and as grammatically correct as possible. Please address me in the emails as Dr. or Professor Tupper, not as "hey." Also (I mean following respectfully): Just because we all have email addresses does not mean you should email me and expect an immediate response, nor does it mean you should email me with every question that you have. I will reply to your emails within 48 business hours from its sent time. There are times when I miss an email, or it gets sent to my junkbox. If you do not hear from me within 48 business hours, do not get angry, please just email me again. That said, I will not reply to your emails unless you ask me a specific question. Do not email me if you missed a class and want me to tell you what material you've missed in class. Do not email me telling me that you are going to be late to class, or that you are going to miss a class, or that you have missed class. Do not email me asking for any logistics/instructions that I explained previously in class. For all of those types of questions, please use the discussion board, or ask your classmates. Do not email me asking for extensions or to make up a field trip on your own time. Please feel free to email me if you have questions about the course content or if you want to set up a time to meet and discuss some of the course content. Please email me if there are serious circumstances that are beyond your control that may need my attention (i.e. health or job related issues or conflicts). Again, the majority of questions can be answered by emailing a classmate, or by using the discussion board.

INTRODUCTORY LETTER, GENERAL COMMENTS ON SUCCESS IN THIS COURSE, AND MISCELLANEOUS RULES: Please write a brief statement and include something semi-personal about yourself, (e.g. a couple of hobbies/sports/major etc; it's optional). Also let us know where (if) you work and how many hours you work per week. I am sure your classmates (myself as well) are interested to know a little about you. Also include your name, and what you preferred to be called. Post this on the discussion board during the first week of the class.

Doing well in this course requires a substantial commitment. You have probably heard this in other classes that you feel are easy. However, I guarantee you that this is one of the most difficult biology courses at NOVA. This course covers evolutionary hypotheses, systematics, taxonomy, anatomy and physiology. By nature, all of these topics are challenging. You need to set aside quite a bit of time for reviewing lecture notes, reading, and studying after and before every lecture. The lab material is also difficult and time consuming. You will likely need another couple of hours a week to learn the lab material as well (see Table 1 below). I expect citations in your papers to follow CSE (Council of Scientific Editors; <https://writing.wisc.edu/Handbook/DocCSE.html>). Please visit the site. If citations do not follow these guidelines, then points will be deducted. There are no exceptions. A few last comments: please make use of the discussion board and become friendly with other students in the class. It helps calm anxieties about the course if you have some peer support. Be on time to class. I will lock the door 10 minutes after the start of lecture (and lab) and will not open the door until we break (unless I see you). So give yourself plenty of time to get to class. We all live in the DC metro area and understand that there is always traffic. Please do not knock while I am lecturing. If you are going to be more than 10 minutes late for lab, you will not be allowed to attend that lab session. Bring goggles with you to every lab, and wear close-toed shoes. Use of any type of cell phone/tablet/computer is prohibited during lecture unless you have my permission; think of it as a break from the devices. Recording devices are not allowed for note taking purposes without my permission. I'd prefer that you take notes via pen and paper. For most people, seeing information, hearing information, and physically writing information is superior to computer use when it comes to getting the information into your short-term memory. So, get a notebook, and be prepared to write. Much of the lab includes dissection. Although the animals are not living, they lost their life so that we could learn. Handling the animals in a disrespectful and unprofessional manner will not be tolerated. If you are caught using the animals for anything other than dissection, you will be removed from the course and receive a failing grade.

Tentative Lecture Schedule (We may deviate from the schedule, I will notify you a week before each exam of the date)

PART I. INTRODUCTORY MATERIAL, CONSERVATION, PARAZOA, THE DIPLOBLASTS, AND SMALLER LOPHOTROCHOZOA

- Course Introduction, Characteristics, Origins and intro to Basal Phyla (Parts of Chapter 8, and Chapter 9)—Week 1
 - *Read the history of zoology document, and also read chapter 1—Week 1
- Basal Phyla (Chapter 9) –Week 2
- The Smaller Lophotrochozoan Phyla (Chapters 10) –Week 3
- **Exam I (175 points)—Week 4** (start mollusc lecture after exam)

PART II. LARGER AND LESSER KNOWN LOPHOTROCHOZOA

- Molluscs (Chapter 11)—Week 5
- Annelids (Chapter 12) – Week 6
- Lesser Known Lophotrochozoa (Chapter 12) Week 6
- **Exam II (175 points)—Week 7** (start smaller ecdysozoa lecture after exam)

PART III. ECDYSOZOA

- Smaller Ecdysozoa (Chapter 13)—Week 7
- Arthropods I (Chapter 14) –Week 8
- Pancrustacea (Chapter 15)—Week 9
- **Exam III (175 points)—Week 10** (Ambulacraria lecture after exam, Chapter 16)

PART IV. INVERTEBRATE AND VERTEBRATE CHORDATES

- Urochordata, Cephalochorda and Fishes (Chapters 17 and 18)—Week 11
- Fishes (Chapter 18)—Week 12
- Amphibians and Reptiles (Chapters 19 and 20)—Week 13
- Birds and Mammals (Chapters 21 and 22)— Week 14
- **Exam IV (175 points) –Week 15**
- **Cumulative Final Exam (300 points)—May 2nd at 5:30pm**

Tentative Lab Schedule (We may deviate from this schedule and adjust point totals accordingly)

If you are not able to attend a lab, including field trips, you are not eligible for the points. There are no make-ups and there is no extra credit. We may change the times/dates of the field trips, as they are weather dependent. You have fair warning that the trip dates are tentative. The SERC field trip will likely take most of the day. Expect to spend about five hours outside. This does not include travel time. During the field trips we encounter things like inclement weather, biting arthropods, mud, water, dirt and thorns. Please show up prepared with the appropriate attire. This includes long sleeves, long pants, boots, a change of clothes, and a snack and water (with hand sanitizer). You must have submitted a signed assumption of risk and code of conduct form before attending the field trip. Before attending the field trip you must read the links posted on blackboard about chiggers, Lyme disease, poison ivy, west Nile virus and other tick borne diseases, and you agree to the conditions of the course and release the NOVA and SERC of liability.

PART I. OFF-CAMPUS FIELD TRIPS

- [Smithsonian Environmental Research Center](#)—April 1st or April 8th. Clear both dates. If the weather is good on the 1st, we will go. If not, we will go on the 8th. Meet in the education building parking lot at 10am. (50 points). Read chapter 6, and familiarize yourself with species below. Field trip will be confirmed by email the morning of.

PART II. ON-CAMPUS LABS AND EXAMS (MONDAYS 4:30-7:10). LABS WILL MEET IN BIOLOGY LAB ROOM BISDORF 395

1. Initial lab meeting, intro and requirements, lecture possible (10 points)
2. Porifera and Cnidaria (10 points)
3. Platyhelminthes (10 Points)
4. Field identification/review/lecture (10 points)
5. Molluscs (10 points)
6. Annelids (10 points)
7. Ecdysozoa (10 points)
8. Echinoderm lab (sea star and embryology 10 points)
9. Fishes (Yellow Perch and Shark 10 points)
10. Field identification/review/lecture (10 points)
11. Presentations (50 points total, with paper)
12. Presentations/Paper Due (50 points total, with paper)
13. **Comprehensive lab exam, animal paper due—May 4th at 5:30 pm(300 points)**
