**Update on Projects**

**Traffic signal installation**
The traffic signal that was originally proposed for the Wakefield Chapel Road/Chapel Drive intersection will not be installed. VDOT reviewed the intersection regarding the placement of a traffic circle. The scope of doing so would include updating a state road. Due to budget constraints and the scope of the project, NOVA will not pay for the installation of the traffic circle.

**CT generator replacement**
The generator that is located on the south side of the CT building will be replaced with a new one which will support the servers located in that building. Work will begin in the next few weeks and will take approximately 60 days to complete. Work will be done on the outside and inside of the building.

**East side perimeter**
A project manager has been assigned to this landscaping project and will be working directly with Kimberly Horne to produce final construction drawings so the project can be bid. The project will follow the conceptual design shown on the Annandale Community Outreach blog. The project is anticipated to be completed by June 30th.
