Panopto's Viewer is a browser-based application that requires Silverlight to play. You can get the latest version of Silverlight by visiting http://www.microsoft.com/silverlight.

1. This is the primary video source. Double-click on the video to full screen it. ESC returns you to the normal view. Playback and audio controls appear just beneath the video and Playback Rate can be selected from the drop menu.

2. A table of contents can be found here. If the instructor uses PowerPoint or Keynote slides, this is automatically built and time stamped based on when the instructor moves to the next slide. Viewers can click on any line of text to advance to the recording or search the table of contents.

3. Content captured during the lecture appear tabbed based on the source. Slides from a PowerPoint or Keynote presentation, screen capture from a computer, feed from a document camera or whiteboard and even another video may display here.

When PowerPoint of Keynote is used, the slides can be viewed in a clickable filmstrip in the large window by using the magnification tab on the right. Click on the magnifying glass with a minus sign to zoom out and see the filmstrip. Click on the magnifying glass with the plus sign to zoom in and only see the current slide.

Aside from a table of contents, there are tabs that allow students and instructors to take notes on a recording. Notes can be shared or private and are searchable. Searching all content in the recording –
PANOPTO: THE VIEWER

Table of contents, notes, info and captioning (where available) – is also an option through the viewer. Info on the presentation that the creator has added will be displayed on the last tab.

Notes can be taken even if a viewer is not logged in but anonymous notes are not retained. Make sure you are logged in when taking notes to be able to review at a later date. Notes taken by the instructor or student can be made public or private and are searchable from the search in the player and the Web Management Interface. Notes are time stamped and can jump to a portion of the recording if clicked on, just like the table of contents.
